## 8<sup>th</sup> French Colloquium on Organic Fluorine Chemistry

Obernai 2011  
March 20 – 24

The 8<sup>th</sup> French Colloquium on Organic Fluorine Chemistry (8<sup>th</sup> CFCO Fluor) will stick to tradition by bringing together renowned scientists, young researchers, industrial colleagues and students who share a passion for Fluorine, and want to exchange recent results and thoughts in a friendly and stimulating atmosphere. The most advanced aspects of fluorine chemistry, from basic research to novel applications, will be discussed.

The status of Strasbourg inevitably confers a European flavour to this Edition of the Colloquium. We will take advantage from this situation to have several speakers and participants from across the nearby borders.
